

Kevin, Class of 2018

To me it means you can pace yourself. There's more freedom to do more stuff. I started my own online business and it has helped me a lot. I feel like I have accomplished something great in my life because I am graduating a year early. I was supposed to graduate next year, but I'm here a year ahead. I feel online school is a great place for you to pace yourself and do your work at your own pace. I felt pressure at a normal school so if you feel the same way take online school. There's a lot of freedom, pace yourself, and have a flexible schedule. When I was in normal school, when I went to a brick-and-mortar school, I didn't have many sales. I had to struggle with my business because I didn't have time to manage it. I didn't have time with homework, and now with online school I was able to accomplish that. I am able to offer fast shipping, and communicate with customers just in case they have any problems. Now I have more time to manage my business, and I also have more time to do more things that I enjoy doing. I don't have to spend three hours a day doing my school work. I also started my YouTube channel so I think that is going to be a great way for me to develop myself.
