

## **Robin Curtis, SCWS Parent of 2021 Graduate**

SC Whitmore provided an opportunity for my child who has some medical challenges to be able to attend a school that did not require her to be in person from 9 to 4 everyday because that really wasn't possible with her health.

She is going to Clemson in August in the Honors College there and received a few scholarships as well as Palmetto Fellows.

She actually did really great. She got perfect attendance every month for the first time in years. School had always been really important for her but after she had these conditions come on it had really become challenging. She actually earned all A's the whole time and was able to dual enroll at Greenville Tech and she's graduating now with 44 credits already.
