

Whitley Jones, Class of 2022

I wanted to change from traditional school to a virtual school, it was overcrowded I wasn't happy in my classes and I wanted to graduate early. The SC Whitmore teachers are great because they are understanding, they are kind, they are always there for you. Coming from a traditional school it would take like a day or two for them to send me an email back, but like I was would typically get a response for my teachers within at least 2 hours. Virtual school works for me because I was able to work more hours in my job, I was able to get my floor design certification, and I was able to have more time to spend with family and friends. After graduation, I will be going to Johnson & Wales University in Charlotte majoring in hospitality.
