

**William Meetze, Class of 2021**

I was coming out of a public school in 2018 with very bad grades. I had probably I think I had a 2.5 GPA and when I enrolled in the SC Whitmore my grades went from being C's and low D's to high A's and B's.

I think just being on time and schedule wise they had me on a good schedule.

Basically, I can work on my schedule. I can get up, I don't know, maybe around lunch time and do my school work and then get some of that done. Go have some fun with my buddies and then maybe come back later that day and finish them more school.

Hopefully, I am going to enroll in Aiken or Trident Tech here soon for welding, and then from there probably get my experience welding and then probably come back to a four-year school and get my business degree and go into Contract Welding.
